RemoteXs®

Your library Patrons will thank you for:

- **Modern easy to use Library portal experience.**
- **Fast, Seamless and Secure access to library subscribed e-resources.**
- **Anytime, Anywhere access from any device using a standard browser.**

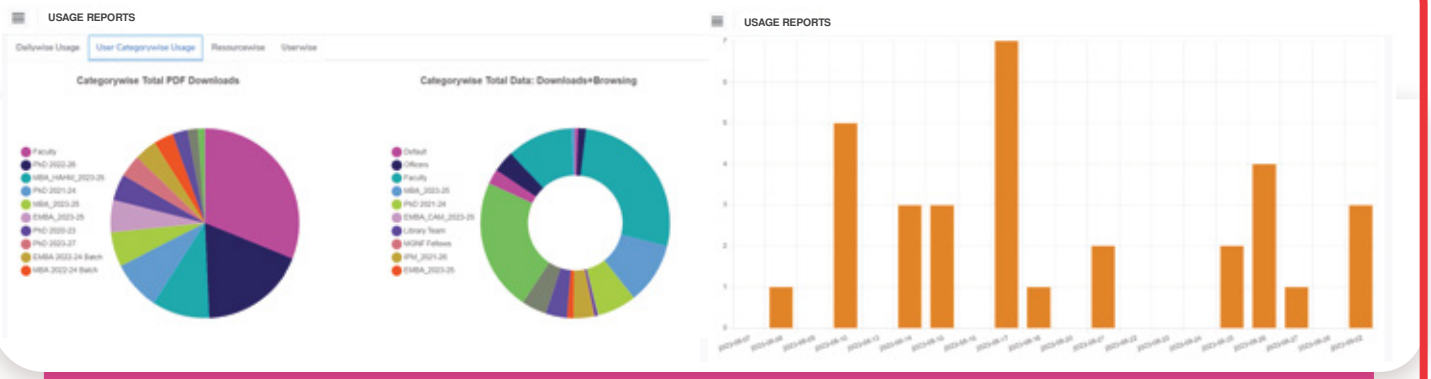
Allow users to easily discover and access your library's subscribed resources on your Library's dedicated RemoteXs portal.

- A-Z listing for Databases, Journals and ebooks.
- Simple and efficient search and Filtering.
- Integration of subscribed discovery, OPAC and other library services.
- Feedback, request forms with email notification.
- Reliable Amazon AWS hosting, with automated backup and monitoring.

Provide secure and Simple Remote access facility to your institutes authorized users with multiple authentication methods.

- Allow users to sign in with institute Google account (Google for your domain), MS Office 365 accounts or institute SSO (Oauth 2 or SAML 2).
- Even if the institute has no SSO, built-in authentication can be used.
- Hybrid methods can also be used, where user list is uploaded and authentication can be done using sign in with Google.

Reports



Simple to generate Reports which can help meet Committee and Accreditation.

- Reports are processed almost in real-time (they are available to the admin user at anytime).
- Reports which can drill down to minute details (User wise, day wise, resource wise, category wise and more).
- Standard report formats (Excel, CSV, HTML etc).

Super flexible authentication methods - Remotexs can work with practically any type of publisher authentication.

- IP authentication.
- SAML based (similar to Openathens and Shibboleth).
- User name and password based.
- Redirect authentication.
- LTI integration etc.
- API based, etc.

Powerful and simple administration which makes management of the service super simple.

Intuitive admin user interface to manage users and control the content that end users can access.

Dedicated best in class support team which is driven to help users and customers.

Users and Customer Support Team.
